

Additional Information for Panel beating Package

Herewith is information that will assist you in deciding that the Dr Smash program is the system for you. Dr Smash has been running for over 15 years and is a family run business, which aim at offering a **complete solution and support** to the running of a profitable panel beating business.

Programme Overview

A South African Panel Beater wrote the Dr. Smash program for Panel Beaters. The Owner specifies the way he wants his company to run, and is safe in the knowledge that his rules will be applied. At the same time, allowed the flexibility to make a profit. Dr. Smash is a menu driven Panel Beating Shop Management & Control System that uses the Windows platform (vista compatible). Thus having ease of use and user friendliness. The beauty of the Dr. Smash program is that you can either use the whole program or select whatever areas you require. The program has recently been re-written to include many new up to date features keeping you ahead of the competition.

Optional Extras

Quote letterheads adapted to your shop Dr Smash provides a standard letterhead, but if you would like your own logo's on your Invoice and Quote

Hardware Specifications

Probably the most expensive part of computerising your shop will be the hardware. Use the recommended list as a guide and buy from a reputable supplier who will support you and not sell you an inferior quality computer.

Suggested Minimum Specifications

- | | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none">○ Server (Where your data is stored)
Pentium 4 or better
Modem (for modem / Email Support)
512 Meg – 1 GIG RAM (2 GIG for vista
80 GIG Hard Drive minimum
Super VGA 17 inch Colour Monitor
Keyboard & Mouse | <ul style="list-style-type: none">○ Workstation (You work on the program only)
Pentium 4 or better
512 Meg RAM (1 GIG for Vista)
Min 6 Gig Hard Drive
Super VGA Colour Monitor
Keyboard & Mouse |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
- **Printers** Dr Smash recommends the page printers. Preferably a page printer with a separate black cartridge as a colour cartridge will be uneconomical. A continuous paper dot matrix can be used but you will find them slow and maybe even unprofessional.
 - **Uninterrupted Power Supply (UPS)** It is essential that the UPS covers all computers and Switches. As it will ensure a smooth flow of power to all equipment and protect it from all power surges and complete power failures. All information will be protected in the event of a power failure, with 30 minutes back up time available to shut down safely and perform backups.
 - **Internet Access:** although the Dr Smash program itself does not require internet access, it is beneficial as all updates, upgrades and support are done via the internet.

Networks Specifications

The networking facilities built into Windows XP or Windows 7 should prove adequate for the smaller installations. As you add more computers your network will need to become more sophisticated. The Dr. Smash Program is easily networked using Novel or Windows Server.

We recommend the following configurations:

- 1 to 5 Computers runs happily on a Windows XP and Windows 7, or Vista Network. We suggest that a Switch is used to connect the computers.
** We strongly advise at least 2 GIG Ram per computer for Vista operating networks.
- 5 to 9 Computers. Because of the load, we suggest that one computer is used only to handle the data, and no user operates that machine.
- 9 to > Computers. It is now time to think in terms of an upgrade to a full Stand-alone Network Server using Lynex, Windows Server or Novel.

Training

Training is provided with the complete package. There is an on-line manual that has explanations on how to carry out the required procedures, step by step.

A Dr Smash consultant will conduct training at your premises according to your support or no-support contracts.

The Dr Smash consultant will require a quiet room / office where we can do the training, with no disruptions. This office can be on or off the premises. If this office can not be provided then Dr Smash can not be held responsible for your staff lack of training due to interruptions.

Software Prices

The Software Prices are determined by each shops requirements. I.e. Number of Users, What Network etc. We have a starter package were two people can access the information at a time, no matter how many computers you have. As your staff become literate on the computers and require more, you can purchase additional users, therefore spreading your costs out over a period.

Please contact me for a quotation.

Support Contract :

Monthly Support (2 users) - R460-00 per month.

Dr Smash prides themselves on the back up and support that they offer. The software contract takes effect a month after installation. The monthly support fee is based on the number of users purchased.

The software support contract entitles you the following :

- Free Telephone and Modem Support :
- Additional Support
- All updates to the installed version are Free
- Discounts on all additional modules

Dr Smash Users

Please feel free to ask contact me for a list of Dr Smash users should you wish to contact them for referrals
